

# Võ Ngọc Nguyên Chương

Backend Developer

## CONTACT

- ☎ [0784393356](tel:0784393356)
- ✉ [chuongbd1012@gmail.com](mailto:chuongbd1012@gmail.com)
- 🏠 12 District, Ho Chi Minh

## EDUCATION

2022 – Now  
University of Industry and Trade –  
Information Technology  
Ho Chi Minh City (HUIT)  
GPA: 3.56/4

## TECHNICAL SKILLS

Programming Languages/ Library:

- Javascript (TypeScript), Java, C#, Python, HTML5, CSS3

Frameworks/ Platforms:

- Spring Boot, Java Swing, Spring Security, Java Servlets
- ASP.NET Core MVC, ASP.NET Core API
- ReactJS, NextJS, Angular, Tailwind CSS, Zustand, Redux, React Query

Database Management System:

- MS SQL Server, MySQL, SQLite
- Firebase, Redis, Elasticsearch

Tools/IDE:

- Git, GitHub, Docker, Navicat, PostMan

Others:

- Understanding of OOP methodologies
- Experience with JWT authentication
- Kafka (Message Broker)

## Achievements

2nd Place, University Scientific Research Competition 2025, Semester Scholarships Awarded (2024 & 2025)

## LANGUAGE SKILL

English: Reading & Listening  
Toeic: 700

## WORK EXPERIENCE

**Ricons Construction Investment JSC** June 2025 – September 2025

### AI Agent/Backend Developer Intern

- Developed key components for a multi-agent AI chatbot to streamline information access in construction project management.
- Built and optimized a Retrieval-Augmented Generation (RAG) pipeline with LangChain, FAISS, and Gemini, achieving high accuracy in retrieving data from unstructured documents.
- Designed a collaborative multi-agent architecture using Google's ADK and LangGraph, allowing agents to perform specialized tasks like data analysis and visualization.
- Created backend RESTful APIs with Python (Flask), MySQL, and Redis to handle data operations, reporting, and secure authentication.
- Containerized the full application stack with Docker and established a GitLab CI/CD pipeline for automated deployment.

## PROJECTS

**Project: Health Companion** March 2025 – Now

### Team size: 1 – Role: Backend Developer

**Project Description:** Developed a fitness tracking system enabling users to manage their health journey. Features include JWT authentication, profile management (weight, BMI), logging workouts, daily activities (steps, water), meals, and sleep. Users can set and track personal fitness goals. The backend, built with .NET Core 8, JWT & Google/Facebook OAuth 2.0, utilizes a layered architecture with CQRS (MediatR), EF Core 8, and FluentValidation for secure and robust API endpoints.

**Framework & Platform, Database:** Flutter, NET Core 8 API, MediatR, FluentValidation, SQL Server, API Gateway, Redis, EF Core 8, JWT Authentication.

**Github:** <https://github.com/chuong1210/ApiFitnessApp>

**Project: eBookstore** September 2024 – December 2024

### Team size: 1

**Project Description:** Developed a fully functional e-commerce book website using .NET Core MVC, incorporating SQL Server for data management and Elasticsearch for enhanced search capabilities. Implemented secure user authentication (login/registration), shopping cart functionality, order tracking, and VNPay payment gateway integration. The project also includes a comprehensive admin panel with CRUD operations for product, category, and order management.

**Framework & Platform, Database:** ASP.NET Core MVC, SQL Server, Elasticsearch

**Github:** <https://github.com/chuong1210/BookStoreMVC>

**Project: VShop** December 2024 – Now

### Team size: 1 – Role: FullStack Developer

**Project Description:** Developed an ASP.NET Core 8 e-commerce backend API using SQL Server and the Repository Pattern. Implemented user authentication (JWT & Google/Facebook OAuth 2.0), Elasticsearch for optimized product search, Redis for caching (cart, product/category, tokens), and Apache Kafka for asynchronous order processing connecting inventory/email systems, product image management via Cloudinary. Integrated VNPay/ZaloPay payment gateways and exposed RESTful APIs for a Next.js frontend.

**Framework & Platform, Database:** ASP.NET Core 8 API, EF Core 8, SQL Server, JWT, Redis, Kafka, Elasticsearch, Cloudinary, VNPay SDK, ZaloPay SDK, Next.js, Angular.
